Built for agencies, tactical teams, EMS providers and organizations seeking configured medical response kits.

01 / PURPOSE-BUILT RESPONSE

CONFIGURE FOR THE MISSION

More than a backpack: a practical way to organize medical essentials for fast access in the field.

STRATEGIC POCKET LAYOUT

Items can be arranged by access priority and size, with critical trauma supplies positioned in easy-to-reach compartments.

COMMON SUPPLY CATEGORIES

BLEEDING CONTROL

CAT tourniquets, QuikClot hemostatic gauze and related trauma dressings.

AIRWAY & PREP

Nasopharyngeal airways, lubricant and iodine/antiseptic supplies.

PATIENT SUPPORT

Emergency blankets, face shields, medical tape, adhesive bandages and sterile water.

ASSESSMENT & DRESSINGS

Pulse oximeters, compressed gauze and compression bandages.

Flexible by design. Contents, placement, bag layout and quantities are selected for each order.

Photo shows an illustrative equipped arrangement. No fixed contents are implied unless itemized in a quotation.

02 / SAMPLE KIT CONFIGURATIONS

TRAUMA & TACTICAL RESPONSE

Start with a commonly requested format, then tailor the loadout to your mission, training and procurement requirements.

01 / EXAMPLE

TRAUMA & BLEEDING CONTROL

A focused medical backpack organized for rapid access to external bleeding-control supplies.

- Tourniquets and hemostatic gauze
- Responder pressure bandages and compressed gauze
- Trauma shears and nitrile gloves
- Emergency blankets and additional dressings

02 / EXAMPLE

TACTICAL MEDIC / IFAK REFILL

Designed to supplement multiple individual first aid kits or replenish field medical supplies.

- Multiple packaged trauma components
- Chest seals and gauze options
- Airway adjuncts where appropriate
- Modular resupply for individual kits

Customer-defined. Products shown in photos and examples are not a standard included bill of materials.

03 / SAMPLE KIT CONFIGURATIONS

EMS & MULTI-PATIENT SUPPORT

Build a larger response kit with assessment, dressing and patient-support supplies alongside trauma essentials.

03 / EXAMPLE

EMS / BLS FIRST RESPONDER

A flexible configuration for initial assessment and basic emergency medical response.

- Pulse oximeters and diagnostic accessories
- CPR face shields / resuscitation accessories
- Bandages, wound care and medical tape
- PPE, blankets and splinting options

04 / EXAMPLE

MULTI-CASUALTY RESUPPLY

A higher-capacity bag for replenishing field teams or supplying multiple responders.

- Additional tourniquets and gauze sets
- Bulk dressings and patient protection
- Packaged IFAK refill components
- Contents organized by response priority

Important: Specific medical devices, brand names, shelf life and authorized use depend on the final approved supply list.

04 / FOUR BAG FORMATS

CHOOSE THE RIGHT BACKPACK

FareTec offers several bag constructions and sizes. Select a style and have it stocked to your specified needs.

BAG 01

Published specifications are indicative and may vary by supplied model. The current website packing entry for Bag 04 is ambiguous and should be confirmed before ordering.

05 / HOW TO ORDER

YOUR BAG. YOUR REQUIREMENTS.

Tell us what you need to carry, who will use it and where it needs to go. FareTec will help determine a suitable backpack and component configuration.

01

SELECT YOUR BAG

Choose from the four listed bag formats, or describe a preferred style, size or color.

02

BUILD THE LOADOUT

Specify trauma supplies, airway products, patient-support items and target quantities.

03

REQUEST A QUOTE

Confirm the order quantity, destination and delivery timing for a tailored quotation.

INCLUDE THESE DETAILS WITH YOUR INQUIRY

- ☐ Bag model / preferred style
- ☐ Quantity and color preference
- ☐ Medical team / intended use
- ☐ Required medical components
- ☐ Delivery country and deadline
- ☐ Any regulatory or tender specifications
